

Caroline Duckworth, Climate Ready, Built Environment
Climate Ready partnership work with Zero Carbon Hub as part of
the Domestic Overheating project
13 August 2014

A support service led by the Environment Agency

Project summary

Evidence gathering to develop motivational messages and simple guidance on overheating in homes. These are to be targeted at key stakeholders in the built environment, local government and health sectors.

Who's involved?

A support service led by the Environment Agency

Objectives and outputs

- ➔ Establish how stakeholder priorities link to overheating risk
- ➔ Identify supporting evidence – motivational messages
- ➔ Identify simple guidance to help stakeholders act
- ➔ Package as individual factsheets for each stakeholder group

Stakeholder priorities and overheating

➔ Stakeholder interviews:

- ➔ What is important to stakeholders now?
- ➔ Where does overheating fit in their priorities?
- ➔ What are they currently doing?
- ➔ What are the barriers?

Stakeholders

- Housing associations
- Local authorities
- Health and Wellbeing boards
- House builders
- Public Health England / NHS

Evidence gathering

What are the impacts now?

What is likely to happen in the future?

- Literature review
- Monitoring projects
- Best practice case studies
- Cost analysis
- User surveys
- Barriers

Key messages

➔ Link evidence to stakeholder needs -
motivating messages

A support service led by the Environment Agency

Simple guidance

- ➔ Simple actions stakeholders can take to understand and address risks

JOINT
STRATEGIC
NEEDS
ASSESSMENT

Stakeholder factsheets

- ➔ Stakeholder specific
- ➔ Motivational messages
- ➔ Simple guidance
- ➔ Used by Climate Ready theme leads, ZCH, govt. depts.
- ➔ Download from ZCH website
- ➔ Seek to share and use more widely

Discussion

- ➔ Questions?
- ➔ Would the project outputs be useful to you? If so how?
- ➔ What can the steering group bring to the project?
- ➔ How would you like to be involved?
